

Confined Spaces Course

Course duration: ½ day
No of delegates: 10 maximum

Introduction

On average, working confined spaces kills 15 people every year in the UK, across a wide variety of industries, from those involving complex plant through to simple storage vessels, In addition a number of people are seriously injured. Those killed include not only those working in confined spaces but those who try to rescue them without proper training and equipment.

Our purpose built training centres throughout the country simulate real life confined spaces to provide realistic scenarios in a safe controlled environment. Course are scheduled at our training centres on a weekly basis, alternatively these courses can be delivered at customers premises providing it is suitable to carry out the practical element of the training.

Courses can be tailored to specific requirements.

It is a requirement that delegates attending these courses should be physically and mentally fit (further guidance provided in standard terms and conditions for courses).

Course Aim

To provide delegates with an awareness of the dangers of confined spaces

Who will benefit

Managers, Supervisors, Engineers and Operators
