

# Lift truck Operator

This course will provide delegates with instruction and practical skills on the safe operation of a lift truck

This is a complete course designed to cover all customer requirements. Our trainers bring a wealth of experience and knowledge and the course is delivered to the relevant standards.

This course can be tailored to the needs of both novices and experienced operators.

In every case, it involves in addition to current classroom and practical sessions covering hazards, risks and general safety in addition to current legislation. Delegates will be assessed with a written and practical test during the course.

## Course agenda

- Current legislation
- Essential controls and features
- How to avoid potential dangers
- The current way to assess loads
- Traveling and maneuvering
- Safe operation and limitations of use
